# SAE Powertrain Information Products. Access the World's Most Authoritative Source for Powertrain Knowledge

SAE International has been the globally trusted thought leader in mobility engineering ever since Henry Ford served as our first vice president in 1905. Just as powertrains are essential to propelling vehicles forward, SAE's Powertrain Information Products are an integral cornerstone of any organization's powertrain technical resources, containing critical resources, publications, and training tools backed by hundreds of years of expert research and the most cutting-edge developments to date.

Curated with intensive feedback from automotive and commercial vehicle industry professionals, SAE's Powertrain Information Products include over 40,000 powertrain standards, technical papers, books, magazines, and more. Gain instant access through the feature-rich SAE MOBILUS™ technical resource platform to timely best practices, insights, and breakthroughs pertaining to:

- Light to heavy duty
- Passenger car, light-heavy truck, bus, off-road, power sports, racing
- Traditional engine, transmission, and driveline – and their electronic control
- Electrification (hybrids and electric vehicles)
- Research and development, product planning, design, simulation, and testing

Trusted Best  
Practices

## STANDARDS

Access the most relevant historical and current powertrain standards.

## TECHNICAL PAPERS

Stay up-to-date with new advancements in applied methods and technologies in these peer-reviewed papers by respected powertrain experts.

## BOOKS

Improve your knowledge on topics — ranging from foundational product development concepts to hybrid and electric vehicles — in these books written for industry professionals and academics.

## MAGAZINES

Explore transformative breakthroughs, influential trends, and probing interviews as contributed by industry thought leaders.

## KNOWLEDGE HUB

Providing high-quality, fundamental and applied knowledge in advanced and emerging engineering, this comprehensive collection of content delivers the technical resources that are needed to gain understanding and advance powertrain technologies. The Knowledge Hub also offers complimentary content, media, and networking opportunities.

## FUEL ESSENTIAL RESEARCH WITH SAE MOBILUS™

Subscriptions to SAE's Powertrain Information Products are designed to cut down your search time and provide you with fast, easy access to a wide spectrum of materials within the feature-rich SAE MOBILUS technical resource platform. Including an intuitive, customizable dashboard, in-platform annotation, and dynamic standards redlining, SAE MOBILUS increases efficiency and powers progress.

Explore the new SAE MOBILUS™ free trial by visiting [sae.org/MOBILUS](https://sae.org/MOBILUS)

## SUBSCRIPTION OPTIONS

### ANNUAL STANDARDS SUBSCRIPTION

Gain annual access to the most relevant historical and current powertrain standards, along with thousands of pieces of critical content.

### ANNUAL SUBSCRIPTION (NON-STANDARDS)

Access thousands of pieces of powertrain content with this collection of SAE Technical Papers, books, magazines, white papers, and more, updated as new resources are published.

### CUSTOM SUBSCRIPTION

Contact SAE Sales to design the subscription that best fits your organization's needs.
