

British Standards Institution

BSI is the national standards body of the United Kingdom, with a globally recognized reputation for independence, integrity, and innovation in the creation of standards that promote and disseminate best practice in all areas of business activity: from business continuity to food safety and hygiene. It develops and markets standards and regulatory solutions that meet the needs of both businesses and society.

INFODOC can provide in Italy the standards and books in English both as single purchases (electronic and/or paper format) and through annual subscriptions to customized collections or entire modules.

IEC — International Electrotechnical Committee

IEC (International Electrotechnical Commission) is a global non-profit organization that supports the quality infrastructure and international trade of electrical and electronic goods. Infodoc can provide the relevant standards as well as all Added Value Products. The international standards published by IEC represent a fundamental technical framework, allowing companies to ensure safe and reliable products on a global scale. Infodoc is an authorized IEC reseller.

AQM Publications

We can provide the prestigious series "I criteri di scelta e di trattamento degli acciai da costruzione e da utensili" ("The criteria for choosing and treating construction and tool steels"), authored by Dr. Cesare Cibaldi, published by AQM, a non-profit consortium company, established in 1982 by a group of companies.

Electronic Obsolescence and Supportability

In collaboration with Source Intelligence, Inc. and Resource Analysis Corporation, Inc., we can provide tools, services, and solutions to manage Obsolescence and Supportability, throughout the expected lifecycle, of complex industrial devices and Defense systems, as well as compliance with environmental regulations (REACH, RoHS, SVHC, Lead Free, Conflict Minerals) through project activities for data collection at manufacturers for finished products and foundries for raw materials.

infodoc

SERVIZI DI INFORMAZIONE TECNICA

Established in 1984, INFODOC was the pioneer in Italy, conceived with the explicit aim of providing a professional service for the research, procurement, and on-demand supply of standards and technical publications from around the globe, through a single point of contact. This service is primarily targeted at companies operating within the industry, to aid in their competitive advantage, which is largely derived from their respective knowledge assets.

The expertise garnered over more than four decades of operation, coupled with strategic distribution agreements with prestigious sources such as standardization bodies, aggregators, and technical service providers, has enabled us to offer our clients a range of high-quality solutions to meet the challenges of the ever-evolving international market.

ACCURIS

SOURCEINTELLIGENCE
Trust your source.

Technical Standards from Around the World!

ACCURIS (ex Techstreet)

Thanks to our business partnerships, we can provide over **3.2M technical standards** published by more than **350 Standards Developing Organizations (SDO)** worldwide, available both as individual documents and as collections via subscription through a Multi-Users Online platform. This platform features automatic updates, service usage reports, and consulted standards reports, facilitating better distribution and management of standards at the corporate level.

We also have direct distribution agreements with several bodies and publishers, including: **ASTM, ASME, BSI, SAE, DIN Media, IEC** and others.

ASTM International

Recognized as a reliable source of technical standards on materials, products, systems, and services, ASTM International is the world's largest voluntary standards development organization. All ASTM International content is accessible on the **ASTM COMPASS Online** platform, which, thanks to a sophisticated search engine, provides tools that help users work more productively and allows immediate access to over 12,000 standards, 1,500 books, and over 47,000 technical articles.

Infodoc can provide:

Annual Book of Standards on paper or online format
Symposia Papers & Special Technical Publications (STP)
Manual, Monographs & Data Series
Journals

DIN Media

Infodoc, in partnership with DIN Media GmbH, can supply a wide range of **DIN, LN, WL e VG**, standards in hardcopy and digital format (PDF).

DIN Media, with 100 years of history, is a pioneer in offering innovative and sustainable products and services in the field of standardization.

Your Reference Technical Library

ASME International

The American Society of Mechanical Engineers is a non-profit professional organization that facilitates collaboration, knowledge sharing, and the development of techniques across all engineering disciplines, while simultaneously promoting the vital role of the engineer in society. The codes, standards, publications, conferences, and professional development programs provide the foundation for the advancement of technical knowledge and a safer world.

Infodoc can provide:

Single norme ASME
ASME Boiler and Pressure Vessels Code

We can also procure a series of other codes and **standards related to the Boiler and Pressure Vessels Code**:

AD2000 – Code for Pressure Vessels	NBIC – National Board Inspection Code
CASTI Guidebooks	PD5500 (BSI)
CODAP – Code for Construction of Unfired PV	RCC-AFCEN
IBR – Indian Boiler Regulations	TEMA – Tubular Exchange Manufacturers Association

SAE International

SAE International is a professional association and internationally recognized authority in the field of design for the transportation industry since 1905.

The online platform **SAE Mobilus** is the most advanced source of information on technological innovation in mobility and transport by sea, land, air, and space. Here you can access full-text content and documents from the various available collections:

Ground Vehicle Standards 'J' Series	SAE Magazines
AMS – Aerospace Material Specifications	SAE Journals
AS – Aerospace Standards	SAE eBooks (over 500 titles)
ITC Engine & Airframe Standards (ex ADS, ex SBAC)	SAE Technical Papers from 1906 to present.
EDGE Reports
